The Italian Journal of Medicine (ITJM) is the official journal of FADOI, the Federation of Associations of Hospital Doctors on Internal Medicine and focus to describe the complex and variable situations confronted by Internists in daily practice. ITJM aims to promote excellence in the practice of internal medicine in hospitals and to disseminate the results of clinical research in internal medicine departments.

The journal also contributes to the updating of hospital internists on general topics concerning public health, including ethical, legal, economical and health policy issues. The Italian Journal of Medicine is a quarterly peer-reviewed journal aiming to publish highest-quality material covering original basic and clinical research on all aspects of internal medicine. The Journal includes original clinical research papers, reviews, case reports and specific sections dedicated to clinical pharmacology, chronic diseases, health management.
